Projects

E-commerce Website

- Developed an e-commerce website as a personal project, demonstrating proficiency in HTML, CSS, JavaScript, and JSON.
- Designed and implemented an intuitive user interface using HTML and CSS, creating a visually appealing and user-friendly online shopping experience.
- Utilized JavaScript to enhance interactivity, enabling features such as dynamic product filtering, real-time cart updates, and interactive product image galleries.
- Integrated JSON data to populate product information, leveraging its lightweight and structured format to efficiently store and retrieve product details.

Movie Website

- Developed a dynamic movie website as a personal project, showcasing proficiency in HTML, CSS, JavaScript, jQuery, SQL, and PHP.
- Created an engaging and visually appealing user interface using HTML and CSS, ensuring a seamless and immersive browsing experience for movie enthusiasts.
- Incorporated user authentication and registration functionality using PHP and MySQL, allowing users to create accounts, log in, and personalize their movie preferences, fostering user engagement and community building.
- Utilized JavaScript and jQuery to enhance interactivity and create dynamic features such as movie carousels, interactive movie posters, and smooth transitions between pages.

My Portfolio

- Created a professional portfolio website to showcase my skills and projects, highlighting proficiency in HTML, CSS, JavaScript, and jQuery.
- Designed and developed a visually appealing and responsive user interface using HTML and CSS, ensuring a seamless and engaging user experience across various devices.
- Utilized JavaScript and jQuery to enhance interactivity and create dynamic features such as smooth animations, interactive navigation menus, and dynamic content loading.
- Implemented a clean and organized code structure, adhering to best practices and maintaining code readability and maintainability.
