Spanish (fair)

Projects

E-commerce Website

- Developed an e-commerce website as a personal project, demonstrating proficiency in HTML, CSS, JavaScript, and JSON.
- Designed and implemented an intuitive user interface using HTML and CSS, creating a visually appealing and user-friendly online shopping experience.
- Utilized JavaScript to enhance interactivity, enabling features such as dynamic product filtering, real-time cart updates, and interactive product image galleries.
- Integrated JSON data to populate product information, leveraging its lightweight and structured format to efficiently store and retrieve product details.

Online Booking Platform Project

- Demonstrated proficiency in both front-end (HTML, CSS, JavaScript, jQuery) and back-end (PHP, MySQL) development.
- Designed and implemented an efficient MySQL database structure to store and retrieve booking information.
- Employed PHP for server-side processing, handling user requests, and interacting with the database.
- Implemented robust security measures, including input validation and data sanitization, to ensure user data protection.
- This project demonstrates a diverse skill set in full-stack development, UI/UX design, database management, security implementation, and effective collaboration using version control. The experience gained highlights a strong ability to create and optimize web applications.

My Portfolio

- Created a professional portfolio website to showcase my skills and projects, highlighting proficiency in HTML, CSS, JavaScript, and jQuery.
- Designed and developed a visually appealing and responsive user interface using HTML and CSS, ensuring a seamless and engaging user experience across various devices.
- Utilized JavaScript and jQuery to enhance interactivity and create dynamic features such as smooth animations, interactive navigation menus, and dynamic content loading.
- Implemented a clean and organized code structure, adhering to best practices and maintaining code readability and maintainability.
